

BIMCO STUDIO BARCELONA
OFFICIAL ARCHITECTURAL & BIM PORTFOLIO PUBLICATION

STUDIO LOCATION
Barcelona, Catalonia, Spain (Headquarters & Architectural Direction)

COLLABORATIVE PRACTICE
Founded on the synergy between Architectural Design & Advanced BIM LOD 350

PROJECT DIRECTORS
Soheil Masti (BIM & Computational Systems) & Siavash Pazooki (Design & Visualization)

DISCIPLINES
High-End Residential Architecture, Facade Engineering, Commercial Centers, Interior Joinery, Urban Plans

VERIFICATION
All drawings, 3D renders, and construction photographs are authenticated BIMCO works.

CONTACT & INQUIRIES
Phone/WhatsApp: +34 610 855 434 | Website: www.bimco.ir | Barcelona, Spain

COLLABORATIVE ARCHITECTURAL & BIM PORTFOLIO

Luxury Villas • Facade Engineering • Commercial Complexes • Interior Millwork

COLLABORATIVE LEADERSHIP & PRINCIPALS

SOHEIL MASTI & SIAVASH PAZOOKI

BIM Director & Computational Architect | Senior Architectural Designer & Visualizer

BIMCO STUDIO • BARCELONA, SPAIN

THE NARRATIVE OF BUILT FORM

Bridging Pure Concept, Topography, and Technical Execution

Architecture at BIMCO is conceived as an uncompromising dialogue between site geography, structural tectonics, and sensorial spatial experience. Operating from Barcelona, our practice merges the Mediterranean appreciation for natural light, tactile materiality, and open living with the exacting rigor of parametric BIM modeling (LOD 300 to 350).

We reject the separation between 'designer' and 'builder'. Every curve, cantilever, and material junction showcased in this portfolio was engineered for real-world constructability—validated through clash audits, detailed shop drawings, and active on-site supervision.

01 / TOPOGRAPHY & CONTEXT

Harnessing terrain slopes, climate, and vistas to shape organic, grounded architecture.

02 / BIM AUDIT & LOD 350 RIGOR

Complete clash resolution, multi-discipline coordination, and precision quantity takeoffs.

03 / MILLWORK & TACTILE INTERIORS

Bespoke cabinetry, lighting calculations, and turnkey executive joinery specifications.

04 / SITE VERIFICATION

Bridging the gap between 3D visualization and physical construction on site.

ARCHITECTURAL BRIEF & NARRATIVE

From our base in Barcelona, BIMCO integrates Mediterranean spatial purity with parame...

PORTFOLIO SCENARIO & CURATED CHAPTERS

Structured Seven-Act Journey Across Scales & Typologies

ACT I TOPOGRAPHY & NATURE

Dalkhani Forest Villa, Concrete & Glass Mountain Villa

PAGES 05 - 08

ACT II FROM MODEL TO BUILT REALITY

Violet Villa, Mountain Chalet, Tehran Dasht (With Site Photos)

PAGES 09 - 16

ACT III URBAN FACADES & TECTONICS

Darrous Facade 2020, Dalkhani Terraces, Modern Urban Blocks

PAGES 17 - 22

ACT IV COMMERCIAL MONUMENTALITY

East Tehran Steel Complex, Erbil Arched Department Store

PAGES 23 - 26

ACT V THE TACTILE INTERIOR

Smeg/Bosch Luxury Kitchens, Master Suites, Wardrobe Joinery

PAGES 27 - 30

ACT VI TERRITORIAL MORPHOLOGY

Diamond Villa Town Masterplan, Zargandeh Riverside Analysis

PAGES 31 - 34

ACT VII LEADERSHIP & CREDENTIALS

Soheil Masti & Siavash Pazooki Biographies, BIM Tools, Accreditation

PAGES 35 - 38

Designing with no limits is every architect's dream, and when it's combined with nature, like this project, it turns to something special. Our designers tried to do their best in creating something unique yet simple to combine with its surrounding

Open space and Semi-open space are used in this project to create different experiences for the user. They can be used in different weather conditions to enjoy the beautiful natural surroundings of the project

BIM & TECHNICAL SPECIFICATION

BIM LOD 350 architectural model, stone facade cladding schedules, daylight optim...

The combination of concrete and glass materials is like a surreal experience where you can imagine the concrete blocks are floating in the air. The outside pool is a great feature for the villa and can enhance the air ventilation and temperature in the house. It also provides a great playing area for the kids

The most attractive rooms in our homes are usually rooms with the largest openings. We believe that during the daytime the sunshine can improve the bedrooms atmosphere, but it's very important to consider right curtains to be used during the night or when you need darkness to prevent excess light from the outside and thick cream color curtains will properly do same in this project. There's something so cheering and fascinating about floor to ceiling bedroom windows

As you can see in the architectural rendering outcomes the terrace has a special design and, combined with its nature, instead of cutting a tree that was within construction area, we decided to combine it with a terrace and use it as a natural shade
Proper lighting is also completing this beauty, an organic shape chandelier in the middle of the space for the main light and spotlight in the ceiling for focused and area lights

ELEVATION

DESIGN

CLIENT : MR GHORBANY
PLACE :DAROOS
YEAR: 2020

Modern elevation design emphasizes clean lines, minimalist aesthetics, and a focus on functionality, often incorporating large windows, flat roofs, and a blend of materials like glass, stone. It prioritizes open spaces, natural light, and seamless integration with the surrounding environment, creating a sleek, contemporary look.

EXTERIOR DESIGN MODERN ELEVATION THE EXTERIOR DESIGN

Proportions are vital in architecture, and naturally in elevation design. They can make or break a design. Rules were being devised since the time of ancient Greece to obtain perfect proportions, and here are some of the most commonly used proportions in design

ARCHITECTURAL BRIEF & NARRATIVE

Exploration of contemporary residential mid-rises with deep green loggias alongside c...

Emphasis is important in the elevation design to lead the eye of the viewer to the entrance, for example, or other important parts, and there are many ways to achieve .emphasis
Emphasis, by contrast, is one way. This contrast can be created by color or shape and .texture

There is also emphasis by iso-•
lation. Isolating one element from the successive pattern of the rest make it a focal .point in a way
e center

Material Palette

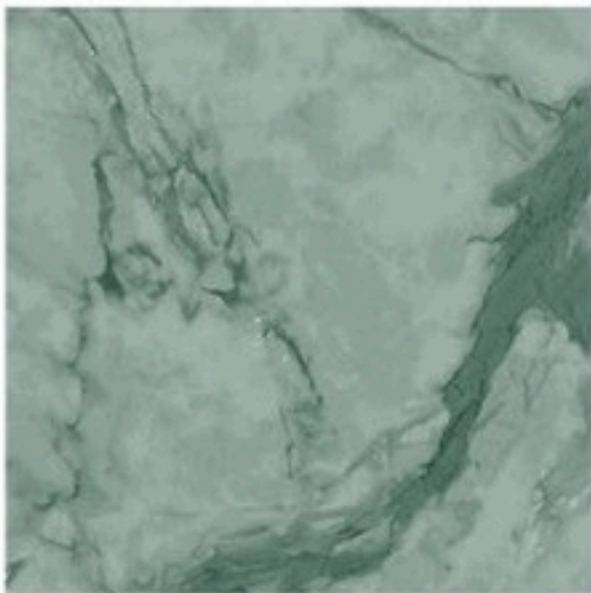

Natural Stone

The term natural stone refers to organic rock quarried from the earth for use as building material. It is a solid composition made up of one or more minerals formed thousands of years ago.

Wicker

Wicker is the oldest furniture making method known to history, dating as far back as 5,000 years ago. It was first documented in ancient Egypt using pliable plant material, but in modern times it is made from any pliable, easily woven material.

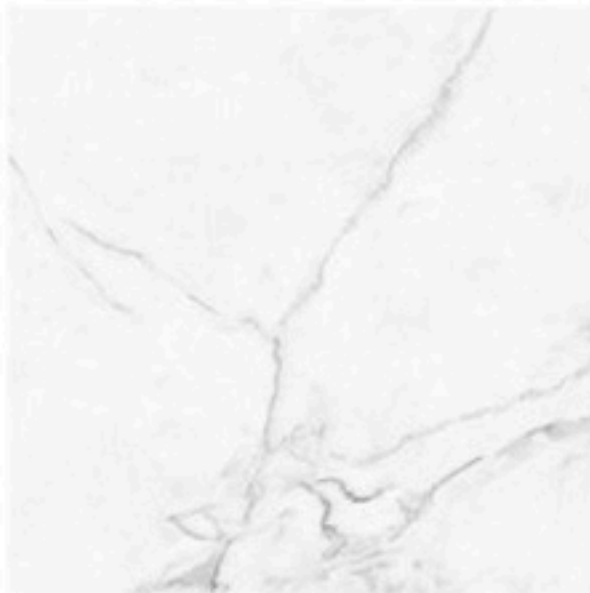

Green Marble

Decisive, ground-breaking and aiming to draw the gaze of every eye. For restless minds who understand that difference is a value in itself.

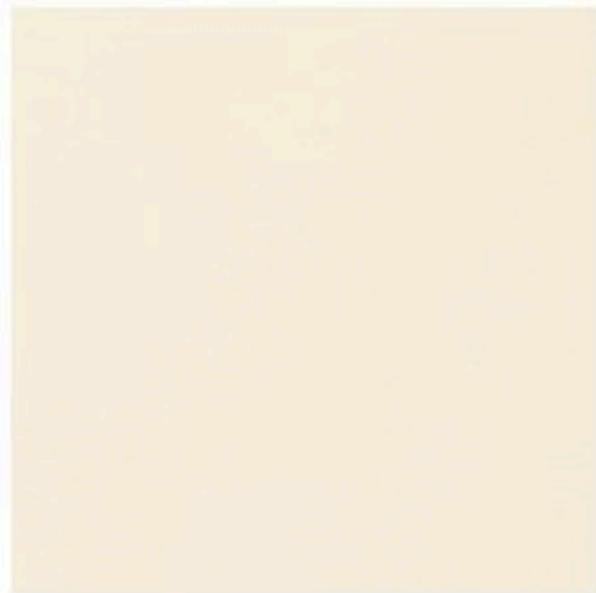

Ulmus Wood

Elms are deciduous and semi-deciduous trees comprising the genus Ulmus in the family Ulmaceae. They are distributed over most of the Northern Hemisphere, inhabiting the temperate and tropical-montane regions of

Marble

Marble is a rock resulting from metamorphism of sedimentary carbonate rocks, most commonly limestone or dolomite (rock).

Spanish MDF Sheet

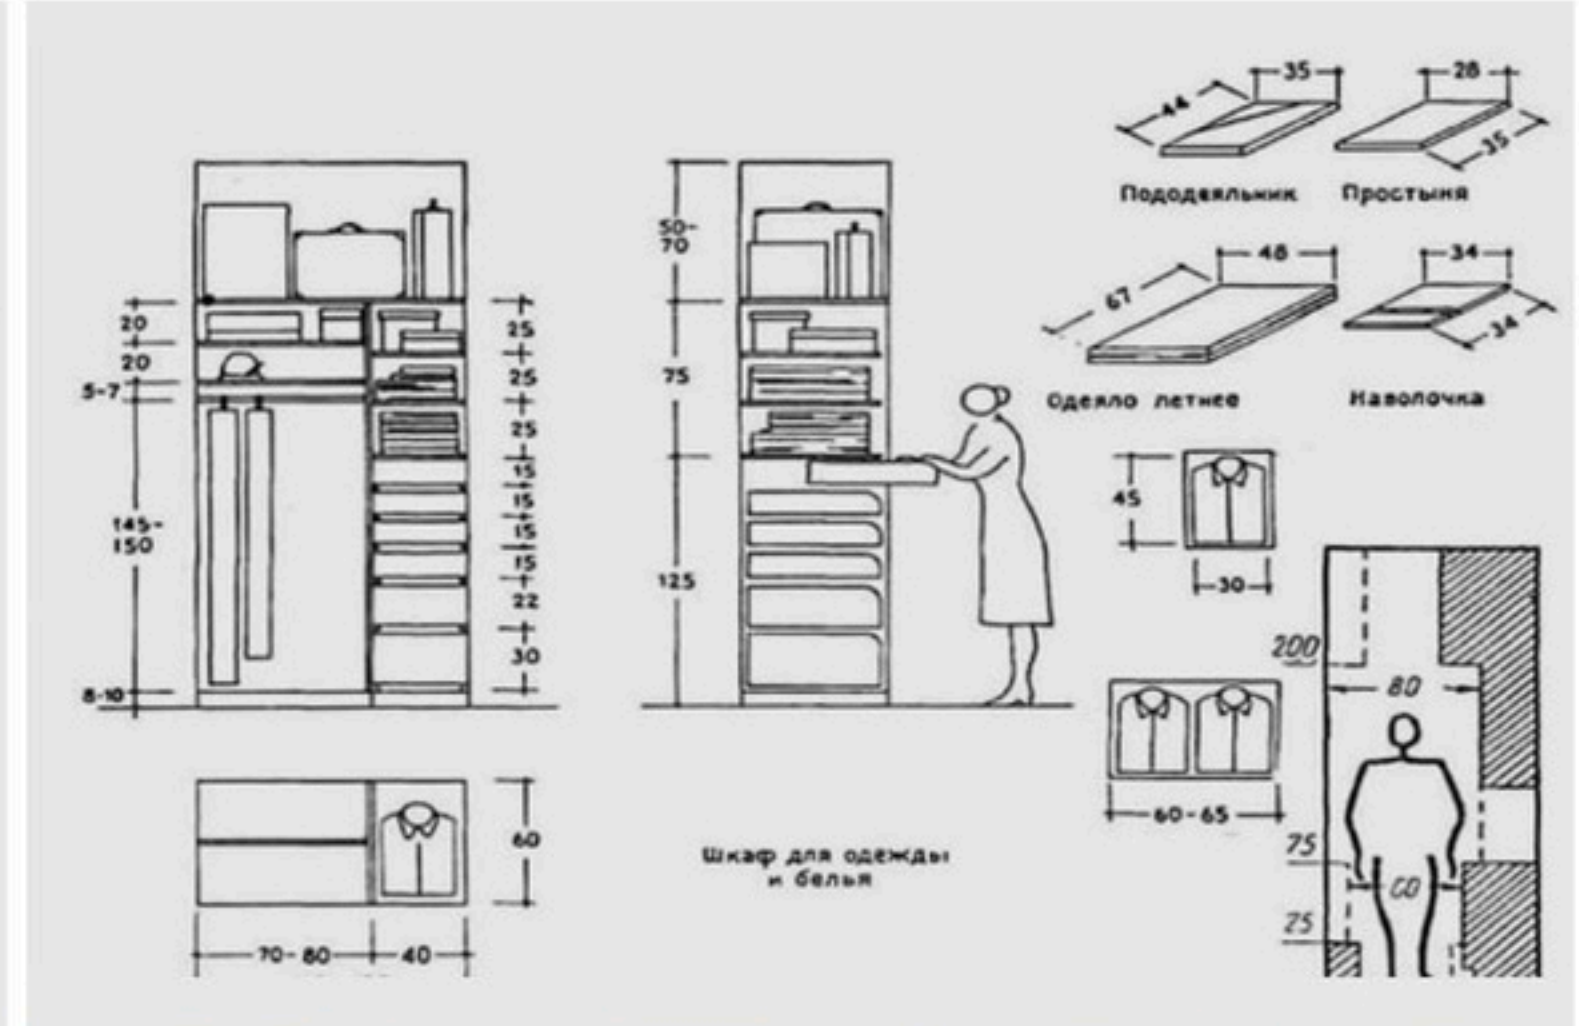

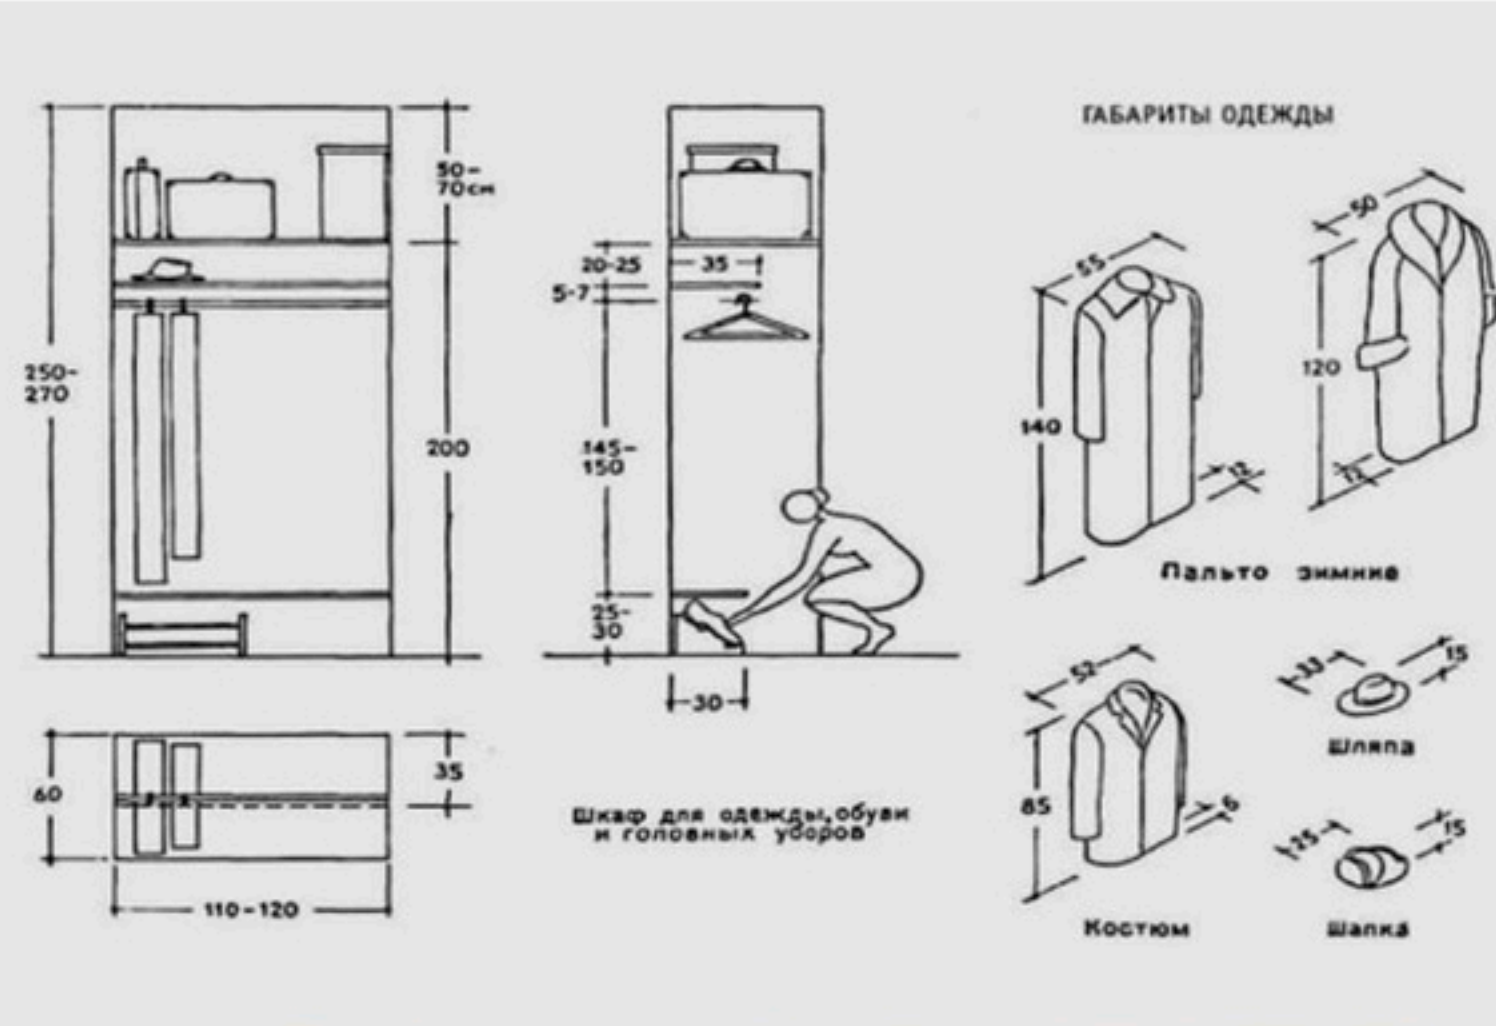

MDF is traditionally made of wood fibers that have been broken down into residuals, then mixed with wax and resins and heat pressed into dense, durable sheets. A sheet of MDF will be heavy, smooth and even, with a flat surface that can be painted or sealed.

VILLA TOWN

شهرک دیاموند دارای 60 قطعه زمین به مساحت 600 تا 1500 متر می باشد

حداقل عرض هر قطعه 20 و طول آن 30 متر می باشد

راه اصلی 16 متر و راه های فرعی 9 متری می باشد

تمامی راه ها به طول کلی 17000 متر مربع سنگ فرش می باشد

دارای 5000 متر فضای پارک و تفریحی در 9 پارک مجزا از 200 متر تا 1700 متر و در مجموع 10 هزار اصله درخت در این مجموعه ها می باشد

زمین تئیس زمین چند منظوره والیبال فوتبال بسکتبال کافه بدنسازی سالن تفریحات ورزشی از امکانات جانبی این شهرک می باشد

تمامی تأسیسات برق آب گاز از زیر زمین احداث شده است و دارای کانال جمع آوری آب های سطحی می باشد

در مجموع این مجموعه در 60 قطعه طراحی شده است و با قرار گرفتن امکانات کامل فضایی آرام بخش برای ساکنین مجموعه فراهم کرده است

SOHEIL MASTI

BIM Director & Computational Architecture Lead

BIMCO Studio Barcelona • Spain & International

CORE PROFESSIONAL COMPETENCIES:

- Strategic BIM implementation, EIR/BEP execution & ISO 19650 compliance
- Multi-discipline clash detection (Navisworks / Solibri) across Architecture, Structure & MEP
- Parametric design automation, Dynamo scripting & computational facade systems
- Quality control audits for LOD 300, 350 and 400 fabrication models
- Comprehensive project lifecycle data management & international client relations

SOFTWARE & TECHNICAL STACK:

- Autodesk Revit (Architecture, Structure, MEP) • Navisworks Manage • Dynamo
- IFC OpenShell • Solibri Model Checker • AutoCAD • Synchro 4D • Python

SIAVASH PAZOOKI

Senior Architectural Designer & High-End 3D Visualizer

M.Arch & B.Arch • BIMCO Studio Barcelona Partner

CORE PROFESSIONAL COMPETENCIES:

- Lead Architectural Concept Design for luxury villas, residential towers & retail centers
- Photorealistic architectural rendering, lighting simulation & cinematic camera direction
- Facade tectonics, parametric louvers, material detailing & stone/wood joinery
- Executive shop drawings, millwork coordination & on-site build supervision
- Masterplanning, topographical terrain sculpting & public realm landscape design

SOFTWARE & TECHNICAL STACK:

- 3ds Max • Corona Renderer • V-Ray • Revit Architecture • Unreal Engine 5
- Adobe Photoshop • AutoCAD 2D/3D • Rhino • Lumion • After Effects

BIMCO COLLABORATIVE WORKFLOW

END-TO-END PROJECT DELIVERY STANDARDS

PHASE 1: BRIEF & CONCEPTUAL MODELING

Parametric volumetric studies, sun/shadow calculations, climate orientation, initial sketch synthesis.

PHASE 2: DETAILED ARCHITECTURAL DESIGN

Floor plans, elevations, section tectonics, interior spaces, material palettes and daylight analysis.

PHASE 3: BIM LOD 300 - 350 IMPLEMENTATION

Full parametric model in Revit, multi-trade clash resolution, MEP coordination, schedule takeoffs.

PHASE 4: HIGH-END VISUALIZATION & CGI

Photorealistic rendering in Corona/V-Ray, lighting moods, virtual reality walk-throughs.

PHASE 5: EXECUTIVE SHOP DRAWINGS

Precision construction documentation, joinery details, stone layout, ironmongery schedules.

PHASE 6: ON-SITE SUPERVISION & QA

Regular inspection protocols, technical site reports, design integrity assurance during construction.
