BIMCO

VOLUME III: COMMERCIAL ARCHITECTURE & URBAN DESIGN

CIVIC SCALE, MOBILITY & RESILIENT URBAN MORPHOLOGY

Comprehensive monographs of commercial complexes, infrastructure and masterplans in uninterrupted project continuity

COLLABORATIVE ARCHITECTURAL PRACTICE & BIM DIRECTION

SOHEIL MASTI

BIM Director & Computational Architect

Information Architecture & LOD 350 Audit

SIAVASH PAZOOKI

Senior Architectural Designer & Visualizer

M.Arch & Lead Concept Formulator

THE CIVIC SCALE: COMMERCE, MOBILITY & URBAN SYSTEMS

Infrastructure, Human Movement, and Large-Scale Architectural Identity

Cities thrive on the seamless exchange of people, goods, and civic ideas.

At BIMCO Studio Barcelona, our commercial and urban design practice operates at the intersection of macro-scale regional planning and precise architectural detailing.

From the heavy logistical dynamics of the East Tehran Steel Campus to the fluid arched gallerias of Erbil Department Store, multi-level highway interchanges, and the ecological rejuvenation of river basins in Zargandeh, each project is engineered for resilience and vitality.

Every project is presented with complete technical documentation: master site plans, circulation analyses, structural spans, and execution frameworks.

UNINTERRUPTED MONOGRAPH PROTOCOL

Every project is presented with complete continuity from plans to execution.

PROJECT ARCHIVE & SEQUENCE

Chronological Architectural Records (All Sheets in Consecutive Order)

01

EAST TEHRAN STEEL COMPLEX

Complete Project Presentation (7 Consecutive Sheets)

PGS 03 - 09 / 32

02

ERBIL DEPARTMENT STORE & GALLERIA

Complete Project Presentation (5 Consecutive Sheets)

PGS 10 - 14 / 32

03

METROPOLITAN HIGHWAY INFRASTRUCTURE

Highway Interchange & Flyovers (1 Sheet)

PAGE 15 / 32

04

ZARGANDEH RIVERSIDE URBAN MORPHOLOGY

Complete Urban River Study (5 Consecutive Sheets)

PGS 16 - 20 / 32

05

HIGH-DENSITY URBAN MASTERPLAN

Complete Urban Masterplan (10 Consecutive Sheets)

PGS 21 - 30 / 32

06

PRACTICE LEADERSHIP & ARCHITECTS

BIMCO VERIFICATION ARCHIVE

Technical Standards & Quality Assurance Protocols

PAGE 32 / 32

Commercial shop design focuses on creating functional, aesthetically pleasing, and immersive spaces that attract customers and drive sales by integrating brand identity, strategic layouts, and optimal use of space

Key elements include customer-centric zoning, engaging display design, effective color and branding, efficient circulation and checkout areas, and high-quality, sustainable materials. The goal is to influence customer behavior, guide their journey, and provide a positive experience that reflects the business's goals and brand values

Mall design focuses on functionality, aesthetics, and customer experience by integrating a logical layout with amenities like clear pathways and ample parking, while also incorporating elements such as natural light, interactive digital displays, and diverse entertainment and dining options to create a vibrant, multi-use destination

Commercial buildings are buildings where commercial activities take place. Commercial buildings include office buildings, retail space, warehouses and more. This differs somewhat from commercial property, which also includes multi-family buildings like apartment buildings. The reason for this is that commercial buildings are where commerce happens, while commercial property earns money for its owners but doesn't have to have commerce happening in it. Multi-use buildings that have a mix of spaces, such as a retail area and apartments, can still be considered commercial in certain circumstances.

Commercial buildings are an important part of doing business, both for those who own them and for those who rent them. A commercial building could contain one or more of many types of businesses, including retailers, restaurants, offices or manufacturing. If you are planning to open a business with a physical location or you want to own and manage commercial properties, it's important to understand what this involves.

a strong metal that is a mixture of iron and carbon, used for making things that need a strong structure, especially vehicles and buildings:
steel girders/rods/struts
a steel helmet
a steel-plated army truck

More examples
a steel mill
Coke is used in the production of steel.
The concrete is strengthened with steel rods.
Guitar strings nowadays are made from steel or nylon.
The gates were locked with a padlock and a heavy steel

EAST TEHRAN STEEL

Client: Mr. yekta & Mr siri
Architect: Berkeh Hoseini -
siavash pazooki

Start: Jun.2018
Completion: Aug.2022
Land area: 90000 m2
Location: Khavaran, Tehran

Mainline department store or simply, the traditional department store, offering mid-to high-end goods, most or at least some .of the time at the full retail price

Erbil Department Store

A department store is a retail establishment offering a wide range of consumer goods in different areas of the store under one roof, each area ("department") specializing in a product category.

ARCHITECTURAL MODEL MAKING
YEAR 2014

It is also key to remember that models are just as much for the architect and the firm as they are for external stakeholders and clients. As explained in the Architect's Journal, models are actually a vital part of the creative process. When a designer is putting together a model, it gives them a chance to see their vision in miniature and give them space to consider what could be improved in real-time.

ARCHITECTURAL MODEL MAKING
YEAR 2014

Perhaps the main reasons why architectural models are so important is because they can highlight the features and utility of a planned structure in a way that a composite sketch or computer-generated image could never do. If you want to demonstrate how the windows of a building will allow light to filter through a space, a model is an ideal way to do so.

Urban plan design

طراحی بخشی از هنر سازمان دادن فضای کالبدی است که با رشته های مختلف علمی و هنری مانند برنامه ریزی شهری، معماری و منظر سازی، مهندسی فنی، مهندسی ترافیک و حمل و نقل روانشناسی، جامعه شناسی و اقتصاد سر و کار دارد و در عین حال با سیاست و فرهنگ نیز ارتباط پیدا می کند. پس می بینیم که دامنه ی فعالیتش بسیار گسترده است.

Urban Design

As hard as it is to describe to lay people what architects do, it may be even harder to define urban design and describe what urban designers do. Too much are residents of cities used to a system where a city "just happens" and where what happens to the city is the result of politics and who has the power and not the result of .masterplans or designs or big ideas

The Interior Design

A part of Design & presentation 2018

Urban Design

It aims to reduce environmental impacts by altering the built environment to create smart cities that Compact urban neighborhoods encourage residents to drive less. [1].support sustainable transport These neighborhoods have significantly lower environmental impacts when compared to sprawling To prevent urban sprawl, Circular flow land use management was introduced in Europe [11].suburbs .to promote sustainable land use patterns

The expansion created many hardships for the working poor and concern for health and safety increased. However, the laissez-faire style of government, in fashion for most of the Victorian era, was starting to give way to a New Liberalism. This gave more power to the public. The public wanted the government to provide citizens, especially factory workers, with healthier environ- modern urban design emerged from devel- ,1900 ments. Around oping theories on how to mitigate the consequences of the indus- trial age

Urban design seeks to create sustainable urban environments with long-lasting structures, buildings and overall livability. Walka- .ble urbanism is another approach to practice that is defined within the Charter of New Urbanism

A part of Design & presentation 2018

Urban Design

20th century, planning and architecture underwent a paradigm shift because of societal pressures. During this time, cities were industrializing at a tremendous rate; private business largely dictated the pace and style of this development

Urban planning focuses on public health and urban design. Within the discipline, modern urban design developed

The Urban Design Group

Architecture Company Profile

A part of Design & presentation 2018

Urban Design

Urban design is about making connections between people and places, movement and urban form, nature and the built fabric. Urban design draws together the many strands of place-making, environmental stewardship, social equity and economic viability into the creation of places with distinct beauty and identity. Urban design draws these and other strands together creating a vision for an area and then deploying the resources and skills needed to bring the vision to life

Urban design demands an understanding of a wide range of subjects from physical geography to social science, and an appreciation for disciplines, such as real estate development, urban economics, political economy and social theory

A part of Design & presentation 2018

Urban Design

Urban design is an inter-disciplinary field that utilizes elements of many built environment professions, including landscape architecture, urban planning, architecture, civil engineering. It is common for professionals in [2].and municipal engineering all these disciplines to practice urban design. In more recent times different sub-subfields of urban design have emerged such as strategic urban design, landscape urbanism, water-sensitive urban design, and sustainable urbanism

The Inter Group Design

Architecture Company Profile

SOHEIL MASTI

BIM Director & Computational Architect

BIMCO Studio Barcelona • Spain & International

EXECUTIVE ROLES & PRACTICE SPECIALIZATION:

- Strategic BIM Implementation & Information Architecture
- Multi-discipline Clash Detection & LOD 350 Coordination
- Parametric Façade Engineering & Environmental Optimization
- Automated Quantities, Cost Modeling & Fabrication Schedules
- Executive Supervision & Construction Quality Assurance
- International Project Delivery across Spain, EU & Middle East

SIAVASH PAZOOKI

Senior Architectural Designer & High-End Visualizer

M.Arch & B.Arch • BIMCO Studio Barcelona Partner

EXECUTIVE ROLES & PRACTICE SPECIALIZATION:

- Lead Architectural Concept Designer & Spatial Formulator
- Advanced 3D Photorealistic CGI & Atmospheric Visualizations
- Complex Elevation Tectonics, Louver Systems & Material Studies
- Executive Floor Plans, Sectional Studies & Millwork Details
- Active On-Site Construction Monitoring & Build Integrity Control
- Over 8 Years Leading Signature High-End Commissions

ARCHITECTURAL VERIFICATION STANDARDS

Executive Quality Assurance & Practice Protocols

01. UNBROKEN PROJECT CONTINUITY

Every architectural commission in this monograph is presented in full chronological sequence without isolated or fragmented sheet sampling.

02. COMPUTATIONAL BIM LOD 350 INTEGRITY

All designs are backed by coordinated Building Information Models with Clash Detection, accurate material schedules, and parametric modeling.

03. VERIFIED SITE EXECUTION & SUPERVISION

Executive on-site supervisory records substantiate physical constructability, structural fidelity, and bespoke craftsmanship.

04. PERIMETER INTELLECTUAL PROPERTY

All original concepts, structural solutions, and renders are protected by international copyright under BIMCO Studio Barcelona.

05. COLLABORATIVE CLIENT ADVISORY

Direct partner access to principals Soheil Masti and Siavash Pazooki for international commissions across Spain, the EU, and the Middle East.
