To: Hiring Committee & Technical Directors

Leading Architectural, MEP & BIM Engineering Consultancy
Dublin, Ireland

Date: September 2026

Location: Dublin / Remote

Subject: Application for Senior BIM Coordinator / Senior MEP & ELV Design Engineer — Dublin Commercial Projects

Dear Hiring Committee,

I am writing to express my enthusiastic interest in joining your senior engineering team in Dublin as a **Senior BIM Coordinator / Senior MEP & ELV Systems Engineer**. With an extensive background in delivering complex architectural envelopes, high-density MEP coordination, and data center infrastructure, I bring a unique combination of deep technical precision under **ISO 19650**, compliance with Irish standards (**IS 10101 / BS 7671**), and custom BIM automation that accelerates design validation from weeks to days.

To demonstrate my immediate value to your commercial and mission-critical projects across Ireland, I recently designed and verified a comprehensive multi-disciplinary case study: the **Dublin Tech Hub 7-Story Commercial Tower (LOD 350 / 400)** tailored specifically for Silicon Docks enterprise tenants:

Dublin Tech Hub — Enterprise LOD 350 Showcase

Live at: dublin-techhub-bim.vercel.app

Complete architectural core, curtain wall, and Levels 3 & 4 enterprise fit-out featuring: **TIA-942 Tier III MDF Room** (4x 42U server racks, dual 32A feeds, InRow 18kW precision cooling, and FM-200 clean agent suppression), **BS 7671 voltage drop audit** (<3.0%), **EN 62676 CCTV surveillance network** with 3D optical vision cones, and **0-clash overhead MEP coordination** between ducts, cable trays, and sprinklers.

Throughout my career, I have distinguished myself through:

- **Multi-Trade BIM Leadership (LOD 300 - 400):** Proven expertise in leading clash detection, model auditing, and cross-discipline collaboration across Architecture, Structure, Electrical (ELV/Security/Power), and Mechanical (HVAC/Public Health).
- **Engineering Code Rigor (Irish & European Standards):** Deep grounding in **IS 10101 (National Rules for Electrical Installations)**, **BS EN 12845** (Fire Sprinklers), **CIBSE Code for Lighting** (500 Lux UGR<19), and **ASHRAE TC 9.9** (Thermal Guidelines for Data Processing).
- **Digital Innovation & Parametric Automation:** Authoring custom Dynamo visual algorithms and Revit API Python routines to automate quantity take-offs (BOQ), electrical load audits, and parametric geometry generation—drastically reducing manual rework.

I am excited by the prospect of bringing this dedication to technical excellence, proactive problem-solving, and advanced digital workflow to your prestigious portfolio in Ireland. I welcome the opportunity to discuss how my technical expertise and passion for high-performance BIM can contribute to your team's ongoing success.

Thank you for your time and consideration. You can review the live, interactive 3D model and QA/QC engine directly on my WebGL showcase at **<https://dublin-techhub-bim.vercel.app>**.

Sincerely,

Soheil Masti

Senior BIM Coordinator & MEP Systems Lead
