To: Hiring Team & Technical Recruitment

ADRM (Advanced Data Risk Management LLC)

Ireland Remote / Dublin Operations

Date: September 2026

Job Ref: BIM Modeler (Ireland Remote - Job ID: 4434331)

Application: BIM Modeler — Ireland Remote / Dublin (ADRM Careers)

Dear ADRM Hiring Team,

I am writing to express my strong interest in the **BIM Modeler** position at **ADRM (Advanced Data Risk Management)**. As a Senior Architect and BIM Specialist with over **15 years of international experience** across Europe and the Middle East—currently based in Barcelona with full EU work authorization—I specialize in executing advanced BIM workflows (LOD 300 to 400), complex multi-disciplinary coordination, and high-precision Autodesk Revit modeling.

Throughout my tenure leading architectural and technical BIM packages at **Gaam Studio** and prior firms, I have directed end-to-end Revit modeling for corporate commercial complexes, public infrastructure, and luxury residential projects. My day-to-day expertise directly aligns with ADRM's focus on high-fidelity modeling, risk mitigation, and seamless data integration:

- **Advanced Autodesk Revit & Parametric Family Creation (LOD 300–400):** Comprehensive mastery of Revit architectural and multi-trade modeling, custom parametric family authoring, complex geometry detailing, and automated schedule/BOQ generation.
- **Multi-Disciplinary Coordination & Clash Mitigation:** Extensive track record integrating Architectural, Structural, and MEP systems, running rigorous clash-detection matrices in Navisworks/Revit, and resolving constructability issues prior to execution.
- **Technical Compliance & Standards:** Deep familiarity with European building standards, execution detailing (*Proyecto de Ejecución*), and structured digital delivery under ISO 19650 protocols.
- **Remote Collaboration & Delivery Agility:** Proven ability to work autonomously across distributed European teams, maintaining strict quality assurance (QA/QC), precise milestone tracking, and seamless cloud model sharing (BIM 360 / ACC).

🏠 **Interactive 3D BIM Showcase: Dublin Tech Hub (LOD 350 / 400)** **Live at:** dublin-techhub-bim.vercel.app

To demonstrate my technical execution, I authored a coordinated multi-trade model of a 7-story commercial enterprise tower featuring TIA-942 server rooms, InRow cooling, electrical cable containment, and zero-clash MEP overhead routing, accessible live via my interactive WebGL portal above.

ADRM's reputation for engineering excellence and risk management makes this role an ideal match for my background. Operating from Barcelona (same/compatible timezone as Ireland) with full EU legal work rights, I am prepared to integrate into your remote workflow immediately and contribute to ADRM's ongoing project success.

Thank you for your time and consideration. I welcome the opportunity to discuss my technical qualifications and portfolio in an interview.

Sincerely,

Soheil Masti, M.Arch.

Senior Architect & BIM Specialist
