THE PHILOSOPHY OF THE VILLA

Form, Topography, and the Boundary Between Inside & Outside

A private residence is the purest expression of architectural poetry and structural integrity. At BIMCO Studio Barcelona, our villa designs do not impose themselves upon the landscape; they grow organically from the earth's natural contours. Whether carving into steep forest hillsides or framing panoramic desert horizons, each residence is conceived through a harmonious balance of raw materiality—exposed concrete, tactile timber, natural stone—and endless natural daylight.

Every villa in this volume showcases complete architectural documentation: from initial hand sketches and parametric BIM models to active on-site construction supervision.

VILLA PROJECTS SCENARIO & INDEX

Structured Progression from Mountain Slopes to Built Realities

01	DALKHANI FOREST VILLA	Organic Curved Earthen Architecture	PGS 04-05
02	CONCRETE & GLASS TOPOGRAPHY VILLA	Ground/First Plans, Pool & Daylight	PGS 06-07
03	VIOLET LUXURY RESIDENCE (CONCEPT)	Volumetric Masterpiece & Site Renders	PGS 08-09
04	VIOLET RESIDENCE EXECUTION	On-Site Steel/Concrete Construction Records	PGS 10-11
05	MOUNTAIN STONE & TIMBER CHALET	Slope Architecture & Active Worksite Photos	PGS 12-13
06	TEHRAN DASHT MODERN VILLA	Villa Renders & Pool Foundation Execution	PGS 14-15
07	MODERN VILLA SERIES 01 - 05	Modular Luxury Compounds & Olive Landscaping	PGS 16-17
08	VILLA IN AUSTRALIA	Double-Height Interior, Fireplace & Built Joinery	PGS 18-19
09	BRUTALIST CONCRETE & CANTILEVER VILLA	Glass Bottom Pool & Cliffside Pavilion	PGS 20-21
10	LANDSCAPE, PERGOLAS & POOL REALMS	Outdoor Living & Water Architecture	PGS 22-23
11	DIAMOND VILLA TOWN MASTERPLAN	Gated Riverside Villa Community	PGS 24-25
12	VILLA INTERIORS & BESPOKE JOINERY	Luxury Kitchen & Master Dressing Suites	PGS 26-27

The combination of concrete and glass materials is like a surreal experience where you can imagine the concrete blocks are floating in the air. The outside pool is a great feature for the villa and can enhance the air ventilation and temperature in the house. It also provides a great playing area for the kids

The most attractive rooms in our homes are usually rooms with the largest openings. We believe that during the daytime the sunshine can improve the bedrooms atmosphere, but it's very important to consider right curtains to be used during the night or when you need darkness to prevent excess light from the outside and thick cream color curtains will properly do same in this project. There's something so cheering and fascinating about floor to ceiling bedroom windows

As you can see in the architectural rendering outcomes the terrace has a special design and, combined with its nature, instead of cutting a tree that was within construction area, we decided to combine it with a terrace and use it as a natural shade

Proper lighting is also completing this beauty, an organic shape chandelier in the middle of the space for the main light and spotlight in the ceiling for focused and area lights

URBAN SPACE WISDOM DESIGN
THE EXTERIOR DESIGN
MICRO DESIGN OF URBAN SPACES
LOCATION: PROPHET STREET, ASHRAFI ESFAHANI ST.
YEAR: 2015

Creative City is a concept that by entering the component of creativity in the design, planning and management of the city, a new way for all the people of the society to provide a response to the transcendent needs of human beings such as self-realization, beauty and so on with a strong presence in the public areas of the city, while promoting the sense of satisfaction and civic participation in the quality of the urban space. In fact, creative urban space is a suitable platform that not only accommodates citizens but also is a confluence of pure cultural and artistic thoughts and events.

The wisdom of spaces is not urban angles and dead urban spaces, but on the contrary, because of its smallness, it creates good opportunities to experience hundreds of creative and innovative ways and encourage innovative designers, as well as an opportunity to meet the need for diversity and aesthetic productivity of the city. Considering the importance of shopping activity and the role of walking in the quality of life of citizens (in contrast to the presence of cars and rider movements that disrupt safety and security) in the form of a concept called pedestrian shopping mall, an effective relationship between shopping activity, safety and vitality can be found.

Ambient perception, sense of vision is more involved than other five senses. One of the elements of visual perception is light. Due to the difference between readable and beautiful cities day and night, it can be wrote that the purpose of lighting and beautifying urban spaces is to encourage people to have a stable presence in the space, organize the wall and make the city more attractive, especially at night.

DIAMOND

VILLA TOWN

شهرک دیاموند دارای 60 قطعه زمین به مساحت 600 تا 1500 متر می باشد

حداقل عرض هر قطعه 20 و طول آن 30 متر می باشد

راه اصلی 16 متر و راه های فرعی 9 متری می باشد

تمامی راه ها به طول کلی 17000 متر مربع سنگ فرش می باشد

دارای 5000 متر فضای پارک و تفریحی در 9 پارک مجزا از 200 متر تا 1700 متر و در مجموع 10 هزار اصله درخت در این مجموعه ها می باشد

زمین تئیس زمین چند منظوره والیبال فوتبال بسکتبال کافه بدنسازی سالن تفریحات ورزشی از امکانات جانبی این شهرک می باشد

تمامی تأسیسات برق آب گاز از زیر زمین احداث شده است و دارای کانال جمع آوری آب های سطحی می باشد

در مجموع این مجموعه در 60 قطعه طراحی شده است و با قرار گرفتن امکانات کامل فضایی آرام بخش برای ساکنین مجموعه فراهم کرده است

Material Palette

Natural Stone

The term natural stone refers to organic rock quarried from the earth for use as building material. It is a solid composition made up of one or more minerals formed thousands of years ago.

Wicker

Wicker is the oldest furniture making method known to history, dating as far back as 5,000 years ago. It was first documented in ancient Egypt using pliable plant material, but in modern times it is made from any pliable, easily woven material.

Green Marble

Decisive, ground-breaking and aiming to draw the gaze of every eye. For restless minds who understand that difference is a value in itself.

Ulmas Wood

Elms are deciduous and semi-deciduous trees comprising the genus Ulmus in the family Ulmaceae. They are distributed over most of the Northern Hemisphere, inhabiting the temperate and tropical-montane regions of

Marble

Marble is a rock resulting from metamorphism of sedimentary carbonate rocks, most commonly limestone or dolomite (rock).

Spanish MDF Sheet

MDF is traditionally made of wood fibers that have been broken down into residuals, then mixed with wax and resins and heat pressed into dense, durable sheets. A sheet of MDF will be heavy, smooth and even, with a flat surface that can be painted or sealed.

BIMCO PROTOCOL: DESIGN & MODELING

Stages 01 – 03 • Luxury Residential Protocol

STAGE 1: TOPOGRAPHIC & SOLAR ANALYSIS

High-precision drone survey, terrain slope meshing, daylight & thermal calculations.

STAGE 2: SPATIAL CONCEPT & 3D MASSING

Volumetric studies, private vs. entertainment zones, pool & garden integration.

STAGE 3: BIM LOD 350 RESIDENTIAL MODEL

Parametric Revit model, clash detection with structural concrete & MEP piping.

BIMCO PROTOCOL: VISUALIZATION & BUILD

Stages 04 – 06 • From CGI to On-Site Reality

STAGE 4: ULTRA-HIGH-END CGI & LIGHTING

Cinematic renders in Corona/V-Ray, material mockups, interior ambience simulation.

STAGE 5: FULL EXECUTIVE DRAWING SET

1:20 joinery shop drawings, stone cladding details, door/window schedules.

STAGE 6: ON-SITE QUALITY ASSURANCE

Periodic physical site inspections, contractor coordination, build integrity control.
